

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

NOTES AND NEWS.

DR. ROBERT MORRIS GIBBS, well known as a Michigan naturalist and ornithologist, died of paralysis at his home in Kalamazoo, September 18, 1908, at the age of 52. His name is familiar to most of the older bird men, as he was an occasional contributor to 'Forest and Stream,' the 'American Field,' the 'Ornithologist and Oölogist,' the 'Oölogist,' and the 'Nidiologist' (later the 'Nidologist'), a word originally coined by Dr. Gibbs. His first work of importance was an Annotated List of Michigan Birds, published in Bull. U. S. Geogr. and Geol. Survey of the Territories, Vol. V, No. 3, 1879. He collected a large part of the material for Professor Cook's 'Birds of Michigan,' published by the Michigan Agricultural College in 1893, but the final draft of this bulletin was made entirely by others.

About twenty years ago Dr. Gibbs suffered a stroke of paralysis which
